WELCOME MESSAGE

Dear colleagues ...

It is our distinct honour and privilege to extend to you a heartfelt invitation to the 6th International Conference of the Iraqi ENT Society, A combined meeting with the 7th Medical City ENT Conference, which held in in Baghdad, Iraq on 23rd &24th May 2024, at Babylon Rotana Hotel.

We cordially invite you to join us as we convene to celebrate advancements, share knowledge, and foster collaboration within the dynamic realm of otolaryngology.

Anticipation is high for an outstanding gathering of pioneers representing various subspecialties and countries worldwide. We eagerly anticipate exchanging new and exciting updates across numerous fields of ORL Head and Neck, including Otology, Rhinology, and Skull Base surgery.

In addition to the scientific program, we have organized social events that will provide opportunities for networking, relaxation, and cultural exchange. We encourage you to make the most of your time here, forging connections, and creating memories that will endure beyond the conference itself.

Our goal is for the congress to be a significant professional benefit and inspiration for you and at the same time to leave a pleasant memory for each of you.

We extend our deepest gratitude to our esteemed sponsors, whose unwavering support and commitment to innovation have made this conference possible. Visit their exhibition spaces, where you will witness the latest advancements in medical technology, cutting-edge equipment, and pharmaceutical breakthroughs. Engage in conversations with industry leaders, gain first-hand insights, and explore potential partnerships that will drive the progress of ENT medicine.

In light of these developments, I extend my sincere gratitude to each of you for your contributions and expertise in the field of ENT. With your vision, knowledge, excellence, and experience, you play a vital role in shaping the future of our discipline.

Cochlear™ Nucleus® SmartNav System

Optimising Surgical Care

The Nucleus® SmartNav System is an innovative intraoperative solution designed

to support surgeons during cochlear implant (CI) surgery. This iPad-based and off-the-ear surgical processor solution aims at improving the overall surgical experience and enhance surgical outcomes by offering the following benefits:

- ✓ Wireless, real-time, actionable insights to support navigation during cochlear implant surgery with regards to angular depth and speed of insertion¹⁻⁷
- ✓ Objective measures to support in-theatre decision-making^{1,8,10}
- ✓ Assurance of correct electrode placement and implant functionality to reduce the need for intraoperative imaging post-electrode insertion^{7,8}
- ✓ Automated implant registration, data transfer and intuitive design to deliver a more seamless workflow⁸
